Forecast for Tuesday 30 Apr 2024

Weather: Light persistent rain to start, with some heavier bursts at times. Rain turns continuously heavier by midday as another band moves in from the west. Heaviest of the rain will be on southern facing hills. Rain eases a little and becomes lighter through the afternoon but can be heavy once again in the evening.

Chance of cloud-free hill tops above 600m: 10% in the north

Low cloud and visibility: Low cloud across most parts but most persistent on south facing slopes. Highest summits are likely to remain covered for much of the day. Very poor visibility at high levels, becoming moderate to poor at lower levels during periods of heavy rain.

Meteorologist's View

Rain through much of the day can be quite persistent and heavy at times making conditions underfoot quite hazardous. For people getting up early, it can feel rather cold with the feels like temperatures below freezing.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
14:00 on Mon 29 Apr 2024	6.2mm	6.2mm	7.6mm

Forecast for Wednesday 01 May 2024

Weather: A few light spots of rain in the early hours of the morning as well as some misty conditions but turning drier by the afternoon. Some breaks in the cloud brings sunny spells but the odd light showers may develop at times. Showers can turn heavy before sunset with the risk of some thunder before midnight.

Maximum wind: South-easterly 15 mph gusting 20 mph at times.

Chance of cloud-free hill tops above 600m: 10% in the north to start the day, but increasing to 80% during the afternoon, before reducing again into the evening to 10%.

Low cloud and visibility: Visibility starts off poor through the early morning with light rain but improves to very good but the later morning, into the afternoon. Low cloud starts to lift for a time in the afternoon, allowing the peaks to be cloud free for a brief period. Low cloud returns into the later afternoon and evening.

Temperature: **Valleys:** plus 8 Celsius rising to plus 12 Celsius.
At 600m: Plus 7 Celsius
Freezing level: Above the summits
